

MINICART

The revolution in logistics
automation

Seamless automation.
Intelligent navigation.
Maximum productivity.

Discover the MINICART, our latest innovation in the field of Autonomous Mobile Robots (AMR). It was specially developed to optimize your logistics processes. The MINICART is a versatile standard vehicle which is characterized by its open control architecture and adaptability.

Open control architecture

The Siemens S7 control system allows a seamless integration of your own applications. You can adapt the system to your specific needs and retain full control over your logistics processes.

Modular extensions

The MINICART is more than a transport solution – it's a catalyst for operational efficiency. You have the choice between various modular extensions:

- **Roller conveyor:** available in various sizes and configurations, ideal for fast and smooth material transport
- **Lifting platform:** perfect for tasks that require variable height adjustment
- **Rigid shelf:** provides a stable and secure surface for your goods

Your advantage

Flexibility, expansion of your capacities, reduction of manual intervention and increased efficiency - the advantages of the MINICART are obvious. See for yourself!

Technical Data:

- AMR for the transport of SLCs, containers, racks etc.
- Payload: 110 kg
- Dimensions:
750 mm x 575 mm x 350 mm
- Functions: platform, lift table, conveyor, customized application
- Control: Siemens S7
- Laser-based navigation with obstacle avoidance
- Interface: VDA5050
- Velocity: 90 m/min
